more unloading

Nov 15 Friday

Unloading of boat finished tonight but a good deal of flour had to be put into Butsh warehouse for the night also some cases. Our transportation depends entirely on Butsh who hangs on very cautious & kind about giving us flour.

6) Nov. 16 Sat.

Steele + I went to Drama in Ford van with Maj Saunders. Col Caffo + Maj Barnes also went to Drama to buy buttons + thread for their sewing circle. Dr. Black + B.H. busy setting supplies to warehouse + making noise.

Steele + I stayed in house of a friend of his in Drama.

Nov. 17 Sunday.

Looked about Drama in morning. Col Caffo + Maj Barnes left for Xanthi along with Mrs. H. Dorr + Mrs. J. G. R. Cross to help deported Greeks get back from Bulgaria to their homes.

In afternoon Steele + I rode out to Komista (or Cronista) with Mr. Prohres Djima recommended by Brington to help us. We reached Cronista in cattle hrs. Djima has a large farm there (rented from Monastery) an old worn cetera + dilapidated building but with a comfortable room + beds for Steele + me + a dining room with a small coal stove in it.

Nov. 18 Monday

Conferred with paretos of Cronista + asked him to prepare us list of poor people of his village who had nothing to eat.

Rode to Cherephan (Tsepia Navy) 20 minutes distant + conferred with paretos + symbolon here to same effect.

(Between Cronista + Cherephan in a deep ravine is a vein of fairly good soft coal. Anyone may dig who wants it. A company is said to have applied to Govt for concession to exploit it.)

Rode from Cherephan in 1 hr + 5 mins. to Kimp Kioy (Kioukier) + conferred with paretos + aldermen to same effect as above. Also saw representative of three villages destroyed by the Bulgars. Sent to Provost + Lekkoikia to make same request of them.

In afternoon rode 1 hr to Rodolivos the largest of the villages on N side of Mt. Pangalon. Saw mayor + his council + made request for list of poor.

Spent night here at house of Joachim.

8) Nov. 19 This Day

Rode  $1\frac{1}{2}$  hrs north to Angista - small + unprepossessing village. Saw the paraderos here + asked for list of poor. All are poor but for the present with our limited supply of food we must try to get only the most worthy cases.

Rode  $\frac{3}{4}$  hr. east to Vitasta pleasantly situated little village. Lunched here. Saw paraderos in same manor as above.

Afternoon we rode  $1\frac{1}{2}$  hrs back to Cromista.

Nov. 20 Wednesday

Six ox carts with supplies arrived today from Kavalla. We unloaded them + put goods in storeroom.

Lists also began to come in + we commenced entering tickets for families included.

Nov 21 Thursday

Our first day of distribution. We began with  $1\frac{1}{2}$  oks flour per person but when all lists had come in we found we had to reduce to 1.5ke per person.

## Classification of uniforms

Nov. 22 Friday

Distributing all day. chiefly flour. Also a few blankets + shawls + a little milk.

Nov. 23 Saturday

Distribution finished today. Our lists include total of 572 families + 2066 individuals. Almost everyone of the families sent a representative + got some flour. In the evening came a few from dugouts near Lakhoviria + we gave them double portion of flour as we had no more blankets. They had come 6 hrs journey to get a little flour.

10

Nov. 24 Sunday

We left at 10 + rode back to Drama. Got in late after all British boats had left. Finally got onto in Greek postal ferry + went down to Kavalla after dark without lights.

Nov. 25 Monday

Saw ship flying American flag in harbor this morning. Returned out to the Hellesponts bringing McIninch + supplies from Mitsifene. We got a new warehouse from the Mayor + began unloading. The 6 boats which left Cremona Friday have not turned up here.

Nov. 26 Tuesday

Miss Gladwin left today returning to Salonika. McIninch refused to run the sewing circle + I am unable so I closed it up for the time being to be reopened when there were personnel. Col. Capps came back from Bulgaria today bringing on to Athens.

Col Smyth (British Base Comm) has telegram from Pideagatch that 75 carloads of refugees are on way to Xanthi. He furnished us a truck + we shipped ca 3 tons wire. Supplies to Xanthi via Drama in PM.

Col Capps arrange for two trucks per week to Drama Mondays + Thursdays to transport our supplies for Bulgarian line.

Went out in P.M. with Welch  
 in truck lorry (Lt Mair also) to  
 Dikelitash (fallen stone) ca  
 14 km. out. to investigate mound  
 just off left of road opposite cluster  
 of houses. We found it is a good  
 prehistoric site. Much pottery like  
 in groups. We picked up quantity  
 of various kinds: (A) hand polished  
 or burnished monochrome  
 black ware. (B) Black ware

 Burnished ware

3 completely covered

14) like above with simple geometric patterns in thin white.

(3) Buff ware with large & developed geometric patterns in red (like 1st piece there than?)

(4) Coarse ware with elaborate large geometric patterns raised & filled in with white.

We let get two heads of figurines one perfect (male bearded like caricature of Friedman) in burnished black technique & several torsos.

I got one head in buff technique + one torso of female figurine.

This looks like a very good site & has apparently much painted pottery. At the top of the mound is the ruin of a medieval or later building. The foundations are partly excavated.

III 3

Tuesday Dec 30  
 Stele & I were taken in a  
 Ford to Pragi. Here as found  
 horses waiting for us & with  
 an officer as escort set off  
 at 11 AM for Crumista. The  
 officer (name of Libendes) was  
 formerly Spoup ap'os at Palochari  
 and Nikishan & wished to visit those  
 two villages enroute. It was a  
 cold rainy day but we agreed  
 to go by the route with the  
 understanding that we should  
 arrive at Crumista in the evening.  
 Libendes promised this expressly.  
 We reached Palochari in the  
 rain & sat for a while in a  
 house there eating our sandwiches.  
 Heard tale of woe from wife of  
 former school master (changed by  
 the Bulgars)

Later we rode on in light drizzle  
 to Nikishan over mountain trail  
 where we were obliged to walk  
 part of way leading on horses.  
 Finally reached Nikishan at  
 4 PM in rain. Lt. Libendes wished  
 to stop here for night in house  
 where he lived as Spoup ap'os  
 but we reminded him of his  
 agreement to get us to Crumista  
 by evening. He admitted to  
 agree to go. Distance said to be  
 2 to 2 1/2 hrs. We left at  
 4.40 PM. From now on it

V. Vases <sup>u. 6</sup> perhaps common  
 to the <sup>u. 6</sup> but quite plain  
 no part no decoration

rained steadily somewhat more than  
 a drizzle. We were wet cold & un-  
 comfortable. At 5.30 it was  
 dark and by 6 it was black as  
 pitch. We couldnt see the ground  
 beneath our horses. Also the road  
 was very muddy & wet. We splashed  
 through mud & water from 6 to  
 11 inches deep. We couldnt see  
 & guide & left our horses as they  
 waded. The way seemed interminably  
 & there was no light visible anywhere  
 save from lantern far away across  
 the plain. At last our horses lost  
 the road too & we found ourselves  
 skidding through the mud in a  
 flooded field close by the bank of a  
 foaming stream. The sensation of  
 being lost revived Stele & me from  
 our gloomy disgust at the situation.  
 Our journey had now become an  
 adventure. Our Greek friend  
 however fell into a panic from  
 cold & discomfort. He reproached  
 me for having led him out on a night  
 like this. I remarked that he shared  
 the responsibility for having taken  
 us off the track to visit  
 Palochari & Nikishan. But that  
 was an accomplished fact said he  
 we'd already done that. There's  
 no use going back to that

I rejoice "well" it's also an accomplishment  
 fact that we left Nekochee + that  
 voice here now lost in the mud we  
 got to make the best of it + find  
 the road again + shelter as soon  
 as we can. He judiciously admitted this  
 fact. We dismounted + trudge back  
 through the mud leading our horses  
 until at last we found the road  
 again. Then we went on until after  
 a time we finally saw a light for  
 up in the hills to the left in the  
 direction where ~~our~~ might be.  
 But we couldn't find the trail  
 leading up in that direction. The  
 crossroad being marked by two  
 ruined Turkish springs we remembered.  
 We spent an hour hunting for the cross  
 road but in vain. The best we could  
 do was to find one spring also ruined  
 but this was obviously not the cross road.

Maybe MM I but no evidence  
at ~~cont~~ ~~st~~ ~~to~~ ~~is~~ ~~ever~~  
found with U.F.
